CAREER OBJECTIVE

Full Stack Developer & CSE Undergraduate specializing in MERN stack development and Data Structures & Algorithms. Strong foundation in building scalable web applications, with current work centered on integrating Transformers and Large Language Models (LLMs) to create intelligent, real-world digital solutions.

EXPERIENCE

Full Stack Developer Intern — HalfTone Systems Startup Feb 2026 – May 2026

React.js • Node.js • Express.js • JavaScript • HTML5 • CSS3 • Git • GitHub • Hostinger • Vercel

- Developed and maintained scalable MERN-stack web applications with responsive, user-friendly interfaces.
- Designed and developed the company's official website, ensuring a modern, responsive, and performance-oriented user experience.
- Built and integrated the **VayuCare Forge** blog page as part of the company's next-generation healthcare platform.
- Collaborated with the development team to build, test, deploy, and maintain production-ready web applications using Git and GitHub-based version control workflows.
- Technologies: React.js, Node.js, Express.js, JavaScript, HTML5, CSS3, Git, GitHub, Hostinger, Vercel.

EDUCATION

Vignan's Institute of Information Technology (VIIT)

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.66

2023–2027

PROJECTS

RailwayGo - Railway Exit Navigation System

github.com/subhashadireddy/RailwayGo

HTML5 • CSS3 • JavaScript • (Future: Real-time Live Navigation Integration)

- Developed a railway station navigation system using a **static SVG map** for **step-by-step exit navigation**.
- Implemented **visual path guidance** with support for **English, Telugu, and Hindi**.

CampusConnect - Student-Faculty Platform

github.com/subhashadireddy/Campus_connect

React.js • Node.js • Express.js • MongoDB • REST APIs • JWT Role-Based Authentication

- Built a secure **MERN-based platform** for communication between students, faculty, and administrators.
- Implemented **study material sharing, complaint management, faculty announcements, and JWT-based authentication**.

Finance Tracker - Expense Management System

github.com/subhashadireddy/Finance-Tracker

React.js • Node.js • Express.js • MongoDB • Chart.js • JWT Authentication

- Developed a full-stack **finance management application** for tracking income, expenses, savings, and transactions.
- Built **Chart.js dashboards**, budgeting, expense analytics, filtering, and **JWT-based authentication**.

TECHNICAL SKILLS

Languages	: Java, C, Python
Frontend	: React, Vite, HTML5, CSS3, JavaScript
Backend	: Node.js, Express.js, JWT
Databases	: MongoDB
Deployment& Cloud	: Vercel, Render, MongoDB Atlas , Cloudinary
Tools	: Git, GitHub, VS Code, Android Studio, Anti Gravity, Postman, Overleaf
Concepts	: Deep Learning, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Quantum Computing

CERTIFICATIONS

- NPTEL — Data Structures and Algorithms
- Cisco Networking Academy — Python Essentials, Full Stack (HTML, CSS, JavaScript), CCNS
- Infosys — Soft Skills Training
- ApexPlanet Pvt. Ltd. & Vault of Codes — Web Development Internships (45 Days)

ACHIEVEMENTS

- Academic Merit Award — Ranked 1st among 300 students.
- Achieved a **2-Star** Rating on CodeChef.
- Solved **400+ coding problems** across LeetCode, CodeChef, Codeforces and other programming platforms.
- ASME-SRIC Project Model Expo — Top 10 Project (Piezoelectric Footpath Electricity Generation).
- Selected among the Top 5 Finalists in the AU Ideathon and advanced to the patent evaluation and patent filing process.
